PROFESSIONAL SUMMARY

MCA student and aspiring DevOps Engineer with hands-on experience in Linux, Git, GitHub, Docker and Jenkins. Built and deployed a containerized Flask application with a Jenkins CI/CD pipeline that automates Docker image build and container deployment. Currently building practical skills in Kubernetes, monitoring (Prometheus, Grafana) and AWS. Seeking an entry-level DevOps Engineer role.

TECHNICAL SKILLS

DevOps & CI/CD: Docker, Jenkins, CI/CD Pipelines, Kubernetes, Minikube

Monitoring: Prometheus, Grafana

Cloud: AWS

Operating System: Linux

Version Control: Git, GitHub

Scripting & Programming: Bash, Python

Backend: Flask, REST API

Databases: MySQL, SQLite

Networking: HTTP, TCP/IP, DNS, SSH

PROJECTS

Production Flask App CI/CD

Technologies: *GitHub, Jenkins, Docker, Linux, Python, Flask*

- Developed a Flask application and containerized it with a Dockerfile to create a reproducible application image.
- Implemented a Jenkins CI/CD pipeline that automatically checks out source code from GitHub.
- Automated Docker image build and container deployment through Jenkins, with Jenkins configured to communicate with Docker.
- Troubleshot application and container issues using Linux commands.
- Verified the deployed application end-to-end through the browser.

Kubernetes Application Deployment & Monitoring

Technologies: *Docker, Kubernetes, Minikube, Prometheus, Grafana, Linux*

- Containerized a Flask application and created Kubernetes Deployment and Service configurations.
- Deployed application workloads on a Minikube cluster; practiced Pod management, scaling and troubleshooting.
- Configured Prometheus to collect application and system metrics.
- Built Grafana dashboards to monitor application metrics, Pods, Services, logs and resource usage.
